

Rodney North Green, CEO

Architect, AIA, LEED AP, NCARB

After graduating from the University of Florida with degrees in both Architecture and Construction Management, Rodney Green has enjoyed over 30 successful years of practice as a principal in South Florida. Rod Green is currently serving as CEO of

RNGA Architecture, Inc., a title that he has held for more than 15 years. Rod has directed all operations and growth of the firm that now provides architecture throughout the United States.

as public clients and Local Municipalities. Other project types include health care facilities, retail centers, industrial facilities, single family and multi-family residential projects. A segment of business has been the design of commercial retail projects throughout the United States. This work has been successfully completed with clients such as Sears Holding, Staples and National Tire Battery.

Rodney Green is a member of AIA and certified by NCARB. He has been licensed to practice architecture in 39 states and is a LEEDS Certified Professional.

Rod has also spent much time serving his community. Some of the positions he has held on public committees and local boards include Vice-Chairman of the Margate Community Redevelopment Board, a current member of Broward County Unsafe Structures Board and a current advisor to Broward County Schools Advisory Committee.

7366 Pinewalk Drive South Margate, FL 33063

During his career in Architecture, he has provided the highest quality professional services to clients, some of which include State Farm Insurance Claims Centers, Sears, Winn Dixie, Mayors Jewelers, Walgreen's, Victoria's Secret, Broward County School Board, City of Margate, Broward County Library System, Boys and Girls Clubs of Broward County. To his credit Rod has completed a broad range of projects. Among them are a fire station renovation in Margate, Imperial Point Public Library, Ethan Allen warehouse in Margate, Silestone manufacturing plant in Lauderhill and numerous churches in Miami-Dade and Broward County. Some of the health care facilities he has had the privilege to complete include Park Place Therapeutic Center, South Florida Pediatric Partners and Pitera Eye Center.

Rod has also been able to provide innovation to projects that pose special conditions. His architectural design expertise includes a strong knowledge of not only architectural ideas, but also structural systems and state-of-the-art construction and cladding systems. Rod has been able to consistently meet the individual needs of his clients as well as meet their budgetary needs and schedules. Projects like Imperial Point Library provided unique situations to exercise his design process and produce an extremely successful project.

Projects designed by Rod Green have been recognized and published in *Professional Builder*, *Florida Architecture* and *Gold Coast Architect* for excellence in design.
