# The AbShield™ Advantage

*All AbShield products and application systems are applied by certified applicators.*

All certified applicators must complete an intensive training program to insure that all AbShield products and application protocols are understood and followed. No variations for the AbShield protocols are allowed, this insures that your home is protected for the life of the structure no question about it.

This insures that the application to your home is consistent, meeting our high standards. After the application is complete, AbShield has an independent inspection company inspect your home to insure that the application was done according to AbShield's specification. Then and only then the house will be turned back over to you, for you to enjoy your home the way it was meant to be.

After the home has been treated with AbShield, our quality air test will prove that the air quality is equivalent or greater than a home built with standard American drywall. (\*Most tests conclude better air quality).

Our Limited Life Time Warranty is transferable. Meaning, when you sell your house, the protection goes with it. Tearing out and replacing your dry wall is not the best solution. Because the raw wood and other materials in the house have been absorbing the gases, when the conditions are right they will begin off gassing again and the smell will return. This is not the case with AbShield. Your home is protected for life and you will never have to deal with this again.

Our goal was to come up with a solution and make it cost effective. We have become the most successful leaders in this area, and have the remedy for this horrible issue.

We are anywhere from a quarter to a third of the cost to completely gut your home to replace drywall. Your home will be ready to live in within four to five days. That is a huge difference compared to the months you would have to wait if you decided to replace the drywall completely.

## The AbShield™ Advantage

- A Non-Destructive Solution
- A Fraction of the Cost of ANY Alternative
- Follows Green Initiatives
- Completed Within Days Instead of Months
- Limited Lifetime Warranty
- Independent Laboratory Proven Results for Odor and Corrosion
