RE: Support for FPL Community Solar Demonstration Project at YAA

Dear Dr. Jurado,

Young At Art Museum fully supports the solar energy partnership between Broward County and Florida Power & Light and the installation and operation of the community solar demonstration project at Young At Art Museum. We are supportive of the use of our parking area for the installation. In addition, we welcome the opportunity to work with FPL in the development of an interactive educational exhibit in our Greenscapes Gallery, as well as, the possibly integrating relevant energy and environmental content into our tours and presentations.

As a Gold LEED Certified Building, with 20% of our exhibit galleries dedicated to environmental education, this partnership is fully aligned with our mission.

Young At Art Museum has no objection to any of the terms or conditions of the Solar Energy Partnership Agreement between Broward County and Florida Power & Light for this project.

Sincerely,

Mindy Shrago  
Executive Director/CEO
