RE: DERO FIX-IT STATION DONATION TO ROOSEVELT GARDENS

Dear Val:

Florida Introduces Physical Activity and Nutrition to Youth (FLIPANY) is a non-profit organization whose mission is to empower youth and adults through physical activity and nutrition programs while raising awareness and creating policy changes for healthier more food secure communities. To support this mission, FLIPANY implements the Keep it Rolling initiative. The goal of this initiative is to encourage bicycling for active transport to school, work and for leisure physical activity by providing education opportunities in basic bicycle repair and maintenance.

Our efforts are focused in areas where there are the highest rates of health disparities, fewest numbers of households who have cars and greater ridership of public transit and bicycles for transportation. As a part of this initiative and with support from Broward Regional Health Planning Council, we would like to donate one (1) Dero Bicycle Fix- it station to Roosevelt Gardens. The total cost for this station is \$1,200.00 plus an estimated \$300.00 installation fee.

We will provide staff and community members with technical assistance on included features and maintenance requirements, as well as educate the community on how to repair their bike using the station tools. Please give the opportunity to service your community through these efforts.

Thank you,

Jennifer Harless  
Health Education Specialist  
FLIPANY
