Port Director's Office

**DATE:** April 10, 2018

**JM18 – 009**

**TO:** Deputy Port Director Glenn Wiltshire  
Port Everglades

**FROM:** Captain Jeffrey Morse, Port Everglades  
Bureau of Operations – South Region

**SUBJECT:** LETF FUNDS

BSO Port Everglades is requesting approval to transfer funds from the Law Enforcement Trust Fund (LETF) funds into the District's Capital Fund (23250-42250) for FY18. Attached is a copy of the LETF Sharing Program Recap (dated February 16, 2018) which shows \$314,301 is currently available. The LETF funds will be utilized to purchase thirty (30) Public Access Bleeding Control Stations that will be strategically positioned next to the Automated External Defibrillators (AEDs) that are already stationed throughout Port Everglades.

The mass shootings at the Fort Lauderdale Hollywood International Airport and Marjorie Stoneman Douglas High School have taught first responders that Tactical Emergency Medical Services (TEMS) are vital toward the preservation of life. It is imperative to stop the bleeding quickly and to have bleeding control supplies (tourniquets and dressings) close by and easy to access.

The Broward Sheriff's Office, Port Everglades Departments of Law Enforcement and Fire Rescue have embarked on multiple training initiatives to prepare first responders and civilian Port employees and tenants with the most current life safety curriculum with regards to patient access and bleeding control. The lesson plans currently being taught include Rescue Task Force (RTF), Civilian Bleeding Control (B-CON), and Contact Treatment and Extraction (CTE). As of today, 218 civilian Port Everglades employees and tenants have received the B-CON training and 391 first responders have received RTF training. The newest development of training is CTE which is scheduled to commence the first week of June, 2018.

The cost for the Public Access Bleeding Control Stations will be \$1,500 each (total \$45,000) and the funds will be allocated strictly to the one-time expense of \$45,000 for the purchase of thirty (30) stations that will be installed throughout Port Everglades. The approval of the LETF funds for this project will enable Port Everglades to be one of the first seaports to have these lifesaving kits available to the public.

Your consideration of this request is appreciated.

JM/dmr

### CERTIFICATION

I HEREBY CERTIFY THAT, IF FUNDING IS APPROVED, THE MONIES WILL BE USED FOR AN AUTHORIZED PURPOSE AS REQUIRED BY SECTION 932.7055, FLORIDA STATUTES. BSO SHALL HAVE THE RIGHT, IN ITS SOLE DISCRETION, TO FURNISH THE SAME REPORT AS AN AGENCY OF THE COUNTY THAT RECEIVES FUNDS AND THAT THIS DOCUMENT WILL BECOME A PUBLIC RECORD ONCE RECEIVED BY BSO.

I UNDERSTAND THAT FILING THIS APPLICATION DOES NOT COMMIT BSO TO FUNDING. I FURTHER UNDERSTAND THAT IF AWARDED, BSO IS NOT PROMISING ANY FUTURE FUNDING AND THAT ANY FUTURE FUNDING IS CONTIGENT UPON A NEW APPLICATION AND AVAILABLE FUNDS.

NORTH AMERICAN RESCUE PRODUCTS

Additional Photos

PLEASE NOTE: In some instances, product photos may vary from actual product models, sizes and/or colors listed below.

The first minutes following a traumatic injury are crucial in saving a life. Uncontrolled bleeding can result in death within minutes—even before emergency medical services or other emergency responders can arrive. The North American Rescue (NAR) Public Access Bleeding Control Station provides bystanders and initial first responders with quick and easy access to essential medical equipment to stop life-threatening bleeding in public buildings and populated public areas. The Station includes a clear wall mounted storage case equipped with eight (8) Individual Bleeding Control Kits contained in an easy-to-open carrying case. Also included is one (1) NAR QuikLitter™ for moving injured casualties. Designed to be mounted on a wall at a designated location or to be co-located with Automatic External Defibrillators (AEDs), the NAR Public Access Bleeding Control Station provides publicly accessible medical supplies to control major bleeding.

The rugged storage case provides both physical and environmental protection. It also contains an eyelet that allows for a secondary safety seal to easily identify if the station has been opened or tampered with. The clear design of the storage case allows visibility at any angle and the external mounting tabs enable the case to be easily installed on any wall. The internal design includes a wire shelf that supports the Public Access Bleeding Control Pack and the exterior has rounded corners to help prevent injury if bumped into and comes complete with the mounting hardware.

The Advanced Version includes all equipment found in the Intermediate Public Access Bleeding Control Pack with each of the 8 complete kits also containing the added capability of a hemostatic dressing that enhances blood clotting abilities—for faster bleeding control when treating major bleeding.

Features:

- (1) Rugged, Easy-to-access Wall Case
- (1) NAR Red Carrying Case
- (1) NAR QuikLitter
- (8) Advanced Individual Bleeding Control Kits (Vacuum Sealed)
  - (1) C-A-T® Tourniquet
  - (1) 6 in. Responder ETD (Emergency Trauma Dressing)
  - (1) Combat Gauze LE, Z-Fold Hemostatic Bandage
  - (1) NAR Compressed Gauze
  - (1) HyFin® Compact, Vent Twin Pack
  - (2) Pair, Bear Claw Nitrile Gloves, Lg
  - (1) NAR Trauma Shears, 7.25 in.
  - (1) Permanent Marker, Small
  - (1) Just in Time Instruction Card

Dimensions: H 16 in. x W 16 in. x D 8 in.

NORTH AMERICAN RESCUE

**Public Access Bleeding Control Station - 8-pack Red Nylon with Wall Mount**

**Basic**

Includes:

- 8- red nylon pouches each containing 1 CAT Tourniquet in an easy-to-open nylon carrier
- 1 NAR QuikLitter
- 1- 6" emergency trauma dressing
- 2 compressed gauze
- 2 pair nitrile gloves
- 1- 7.25" shears
- instructions
- permanent marker
- Clear Wall Mount

**Intermediate**

Includes:

- 8- red nylon pouches each containing 1 CAT Tourniquet in an easy-to-open nylon carrier
- 1 NAR QuikLitter
- 1- 6" emergency trauma dressing
- 2 compressed gauze
- 2 pair nitrile gloves
- 1- 7.25" shears
- instructions
- permanent marker
- Clear Wall Mount
- Compressed Gauze and HyFin® Vent Compact Chest Seal Twin Pack.

**Advanced (FOR PROFESSIONAL USE)**

Includes:

- 8- red nylon pouches each containing 1 CAT Tourniquet in an easy-to-open nylon carrier
- 1 NAR QuikLitter
- 1- 6" emergency trauma dressing
- 2 compressed gauze
- 2 pair nitrile gloves
- 1- 7.25" shears
- instructions
- permanent marker
- Clear Wall Mount
- Hyfin® Vent Compact Twin Pack and QuickClot® Combat Gauze LE

## Trauma surgeon takes lead on campaign to train police, bystanders on bleeding control

The team is partnering with EMS providers to conduct the largest "Stop the Bleed" campaign in New Jersey

Oct 11, 2017

By PoliceOne Staff

NEWARK, N.J. — A team is directing a campaign to teach law enforcement and civilians how to control bleeding during emergency situations.

The team, led by Rutgers New Jersey Medical School trauma surgeon Adam Fox, is partnering with EMS providers from University Hospital to conduct the largest "Stop the Bleed" campaign in the state.

"A person can die from blood loss within minutes, so it is imperative to stop the bleeding quickly," Fox said. "Although we don't know the data yet, the scenario in Las Vegas, where there were thousands of concertgoers, could potentially have had dramatically different outcomes if the public knew how to stop bleeding and were armed with the proper tools. People bleeding out from a leg or arm wound would have a greater chance of survival."

"Stop the Bleed" is a national awareness program that empowers people to train and learn how to help with hemorrhage control before responders arrive. Fox's team has trained over 500 responders and civilians.

tourniquets, pressure dressings and gauze.

The campaign consists of a 45-minute course that shows people how to use a tourniquet, pack a wound and stop bleeding with direct pressure. Additionally, a legislation campaign is being planned in order to place bleeding kits in public areas that contain

"Unfortunately, there is no legislation in the country that mandates bleeding control equipment in public spaces," Fox said. "However, we are working with multiple agencies, including the Port Authority of New York and New Jersey, to eventually make these kits available to the public. A legislative campaign is planned for after the election."
