Susan B Anthony Center, Inc.	4Y	6 CAPS, 3 QIPs
The House of Hope, Inc.	3Y/1N	5 CAPS, 3 QIPs
Key BBHC Performance Definitions:		
Quality Improvement Plan (QIP): A type of corrective action utilized for clinical deficiencies identified for the first time, do not impact the safety of the clients and will require an extensive period of time to demonstrate the resolution. An example of this is identifying for the first instance that some treatment plan's objectives are not measurable and/or objective. The Provider will need to implement trainings and ongoing monitoring to ensure this is corrected on a long-term basis.		
Corrective Action Plans (CAP): A type of corrective action required when the deficiencies identified are severe and prevalent within the Agency. These findings require a formal response and require a follow up process. See policy PR 006 Corrective Action Plan Policy.
