Re: Coral Glades High School Generator Funding

Dear Director Henry:

This responds to your letter of June 6, 2019, and confirms that Broward County intends to provide full advance funding to The School Board of Broward County ("SBBC") for the Coral Glades High School generator project, Project Number 4337-26-R, to enable SBBC to timely complete the project, including receiving all available federal funding, so that Coral Glades High School can be utilized as a Special Needs Shelter. Under the terms of the proposed agreement, Broward County would fully fund the project in advance, and SBBC would remit all federal grant funds received for the project to Broward County upon receipt. Both parties would use best efforts to ensure the project is completed within the time limitations (including any requested extensions) of the federal grant.

We provided a draft funding agreement to you earlier this week, and look forward to your comments on the draft as soon as possible so that we can finalize the agreement and proceed with funding this very important project.

Sincerely,

  
Tracy L. Jackson  
Director, Regional Emergency Services and Communications

Cc: Bertha Henry, County Administrator  
Alphonso Jefferson, Assistant County Administrator
